How to measure your item

Step1: Photograph your parts

Lay all the parts you have for restoration on a sheet of paper on a flat surface.

If you want an estimate (break down) for each part you will need to number them up by writing on the paper they are laid on.

Lay a tape measure, ruler or memorable object in the shot so we have a size indicator.

Please also include dimensions eg: L x W x H in mm

Step2: Send us an email with the photo attachment

Send us an email attaching the photo(s). If you can list each of the parts and tell us any additional information that maybe helpful, Such as dents, holes, deep pitting or heavy rust.

Send your email to:
sales@reevemetalfinishing.co.uk

We will send you back an estimate usually the same day or within 24hrs. Note we can't respond outside of our normal working hours.

Step3: Box up your parts and send them in

If you are happy with the estimate pack the items safely ensuring nothing can get damaged in transit.

Enclose a copy of your estimate and your full contact details: Your name, telephone, address for return and your email.
